### How FSAs work

1. You set aside pre tax dollars from your paycheck.
2. You submit eligible expenses for reimbursement throughout the year.
3. You are reimbursed from your FSA for the eligible expenses you submit.

If you pay federal income tax and Social Security tax, this creates about a 20% savings on most of the health or dependent care services you buy. The savings could be more - depending on your income tax rate. And yet, even when you pay no income taxes, the Social Security tax savings is about 7.5% - or $7.50 for each $100 you spend. How much can I save using an FSA?
