

My name is Dr. Dottington Fullwood. I am the Principal Investigator of the Mobility, Aging, Pain and Disparities (MAPD) study at the University of Florida investigating factors that can affect older Black and White men's health. The goal of the study is to identify factors that improve the health and well-being of older Black and White men. I would like to personally invite you to take part in this research study, which will involve a single visit approximately two hours in length to the Jacksonville Aging Studies Center (JAX-ASCENT).

You may qualify to participate in this study if you have low back pain and are:

- a Black or White male 60 years and older
- physically able to use a computer
- proficient in reading and speaking English

At the study visit, you will complete questionnaires about your health and quality of life on an iPad and then you will perform three physical performance tests that evaluate your balance and movement. The study visit will conclude with a brief questionnaire asking about your comfort level with different technologies. For participating in this study you will receive:

- Monetary compensation, \$50
- Free on-site parking
- Free coffee and healthy snacks

If interested, please call us at **904.244.4690** or respond to [jax-ascent@jax.ufl.edu](mailto:jax-ascent@jax.ufl.edu) with your contact information and someone from the study team will call you back.

Thank you for your time and consideration.

---

## HOW CAN YOU PARTICIPATE?
