**DEAN'S FUND RESEARCH GRANT**

The Dean's Fund Research Grant provides support to Residents and Fellows for research projects on which they are the Principal Investigator. The applicant must take a primary role in the design and performance of the study. Up to \$5,000 may be requested and the number of awards will depend upon the amount of available funds and the number of qualified applications. Awards are for one year. If duration of the study exceeds one year, or if the funds have not been totally expended during the first year, a one-year no-cost extension of the award will be considered upon written request. The grant period must conclude prior to the end of the applicant's residency. All unexpended funds will be returned to the Deans Fund. All residents who are awarded grant funds will be expected to prepare a manuscript of their work for submission to a peer-reviewed journal prior to the end of their residency. The Awardees will be expected to submit this project for participation in the annual Research Day competition.
