

UNIVERSITY OF FLORIDA COLLEGE OF MEDICINE JACKSONVILLE
Office of Educational Affairs
RESIDENT MANUAL

IMMUNIZATIONS

Medical and health requirements for residents include documentation of immunization/immunity to measles, mumps, rubella, hepatitis B, and varicella. Immunization against diphtheria/tetanus/pertussis is also required. If documentation of immunization or titers cannot be provided, the resident will receive the appropriate vaccinations.

All residents are also required to have two skin tests for tuberculosis (PPD) within the twelve months of their UF appointment (start) date unless they have had a previous positive test (in which case documentation of adequate treatment and an updated screening will be required). The resident is required to have at least one annual tuberculosis skin tests, and to comply with the infection control policies and procedures of the institutions where the resident is assigned. Screening of the resident for infectious diseases, prophylaxis and treatment for exposure to communicable disease, and immunizations shall be provided directly by the University or through arrangements with other health providers.

Employee Health will provide the following immunizations/titers/services for residents:

- Measles, Mumps, Rubella
- Hepatitis B
- Varicella
- Diphtheria/Tetanus/Pertussis (Tdap)
- Influenza
- Tuberculosis Skin Testing and evaluation
- Laboratory testing according to protocol
