UFJPI Education: CPT Coding

This Class will:

- Outline the importance of the CPT manual and procedure coding
- Introduce all of the CPT sections and their guidelines
- Cover CPT definitions and terms, and basic Medicare and Medicaid billing guidelines
- Show participants how to locate a procedure code based on word for word procedure descriptions
- Involve utilizing the CPT manual and may involve reading assignments and completion of homework outside of class time
- Require participants to analyze and code procedures from every section of the CPT manual
- Teach participants how to appropriately apply modifiers to procedures
- Involve utilizing the CPT manual and independent homework outside of class time

This class requires participants to pass periodical quizzes and a final exam

Prerequisites:

Medical Terminology | Anatomy for Coding
