

UFJPI Education: Evaluation and Management Seminar

This seminar will:

- Explain why documentation is important
- Explain what payers are looking for in documentation
- Explain the principles of medical record documentation
- Discuss and define all E/M services in the CPT manual

Participants will receive a laminated coding card and will learn how to utilize the card as a tool to determine a level of care provided to patients. This is a workshop only; there are no tests or quizzes administered. CEUs (Continuing Education Units) will be awarded upon completion.

Prerequisites:

Medical Terminology | Anatomy for Coding | CPT | Introduction to ICD-10
