

UFJPI Education: ICD-10 Coding

This Class will:

- Explain how to use the ICD-10 manual for diagnosis coding
- Cover the format of the ICD-10 manual
- Explain the characteristics and conventions of the ICD-10-CM codes
- Introduce the major sections and guidelines of the manual
- Explain diagnosis coding from a consumer, insurance and billing perspective
- Expect participants to convert a simple narrative description into a numerical ICD-10 code

This class may involve reading assignments and completion of homework outside of class time. This class requires participants to take periodical quizzes and a final exam.

Prerequisites:

Medical Terminology | Anatomy for Coding
